

In the year 2018 your initiative **DOLB - Lesna zadruga LoÅ¼ki potok** has avoided **115068.0 kg CO_{2e}**. (i)

This refers to your activity, which is compared to a 'baseline scenario':

Domain	Activity	Avoided emissions	Compared to baseline scenario
Energy	Generation of heat	115068.0 kg CO _{2e} 91.0 % CO _{2e}	<p>The energy for space heating is obtained from different energy sources, according to the national heating mix. (i)</p>

The avoided greenhouse gas emissions are equivalent ...

(i) to the emissions **13.0** Europeans cause on average per year ...

... or to driving by car for **494278** km

(i)

Your initiative's reductions compared to TESS case studies
